

EMMANUELE A. JANNINI, MD, OMRI, KSG, KHS

Emmanuele A. Jannini, Full Professor of Endocrinology, Andrology and Sexual Medicine at the Department of Systems Medicine, Tor Vergata University of Rome, Rome, Italy, and head of the Laboratory of Molecular Endocrinology and Molecular Sexology at the University of L'Aquila, Italy, was born in Milan, Italy on April 22, 1960.

Emmanuele A. Jannini has received various awards in the course of his career: the Valerio Monesi Fellowship for Research in Reproduction (1987), the Becton Dickinson Award of the Italian Society of Endocrinology (1992), the First Award of the European Academy of Andrology (2000), the prize for the best Special Issue of the *Journal of Endocrinological Investigation* (2004), and the XXV Ottorino Rossi Award from the "Mondino" Neurologic Institute, Pavia (2014). For his scientific merits he has been elected Officer of the Order of the Merit of the Italian Republic (OMRI) and Officer of the Order of St Agatha (San Marino Republic). Furthermore, he has been elected Knight of the Order of St Gregory The Great (KSG) (Vatican City) and Knight of the Equestrian Order of the Holy Sepulchre of Jerusalem (KHS) (Vatican City).

Prof. Jannini is currently President of the Italian Society of Andrology and Sexual Medicine, General Secretary of the Italian Society of Endocrinology, and Chairman of the Educational Committee of the European Academy of Andrology. Finally, he has served the European Medicines Agency, London, UK, as member of the Scientific Advisory Group for endocrinology and diabetes. He is also Associate Editor of the *Journal of Endocrinological Investigation* and *Sexual Medicine Reviews*, and a member of the Editorial Board of *Andrology*, *Folia Biologica*, and *Endocrine*.

Prof. Jannini's scientific activity is reflected in his >150 full papers published in peer-reviewed international journals (total impact factor: >600; cited >5000 times; H-index: 41). His main research interests are sexual medicine and andrology (erectile dysfunction and subcellular localization of type 5 phosphodiesterase; pathogenesis of premature ejaculation; functional anatomy of female orgasm) and endocrinology of reproduction and sexuality, particularly testosterone and thyroid physiopathology (the role of sexual activity in the control of the hypothalamus-pituitary-testicular axis; molecular localization and the role of the nuclear TH receptor in the male genital tract). He conducts his research in endocrinology, andrology and sexual medicine both from a clinical and a basic perspective employing molecular, clinical and psychological tools. He is the editor of Italian and international textbooks of andrology and sexual medicine, published in different languages (English, Italian, Portuguese, Turkish, Japanese, Chinese). On the strength of his publications, he is listed as in the classification of *Top Italian Scientists* and is active in promoting education in sexual medicine and public sexual health worldwide. Prof. Jannini is a recipient of several public and private research grants.
